

Acumatica with Dimensions

The Cloud ERP for Asset-Intensive Industries

Acumatica Cloud ERP with Dimensions for Facilities and Assets offers the premier business management solution for mid-sized to large facility and asset-intensive companies in the digital economy. It delivers unparalleled depth with an extensive suite of connected business applications.

This solution handles everything from managing facilities, work orders, lease accounting, and maintenance to asset hierarchy and lifecycle, all accessible on any device. It ensures effective controls and efficient operations within a single organized functionality.

Acumatica empowers organizations to enhance productivity and revenue, built on a future-proof cloud platform with unlimited user licensing, an open API for scalability, ease of use, and true end-to-end integration. It is designed to meet the needs of businesses today and in the future.

Connected Business. Delivered.

Facility and Asset Management Tools

Streamline the entire facets of your facilities and assets, delivering automation without complexity, compliance without rigidity, and continuous improvement without unpredictability.

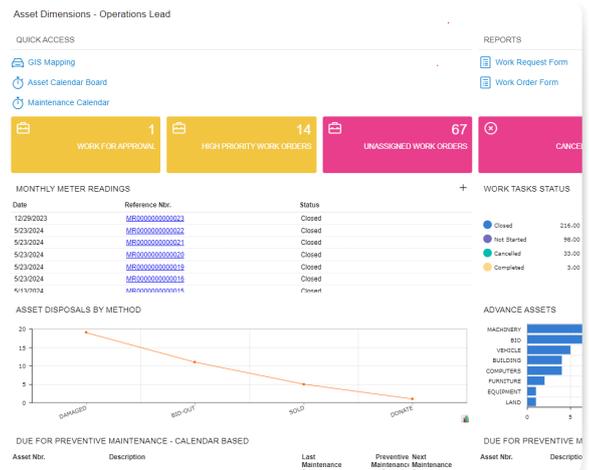

Stay Ahead of the Competition and Lead with Confidence

Enhance Visibility, Seamless Integration, and Efficient Business Decisions

Empower Business Growth - Understand how operators best interact with your equipment using integrated mappings or GIS maps. Get a comprehensive overview of your assets' conditions, utilization, and value to stay on top of operations

Real-time Access - Complete approvals for asset transfers, maintenance, and work assignments quickly from anywhere. Gain actionable insights through dashboards with a 360° view of your entire operation, integrating all your facility and asset data.

Intelligent Decision-Making - Make data-driven decisions with structured asset data. Visualize accurate measures to improve maintenance processes.

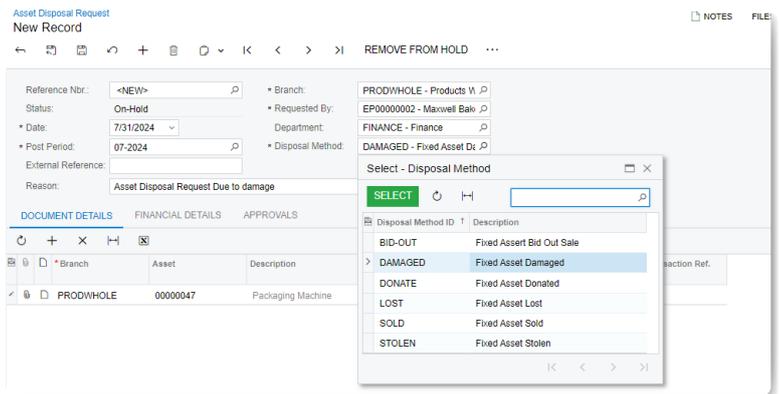

Proactive Financial Management with Ease

Maximize Revenue Opportunities, Accurate and Reliable Reporting

Accelerate Lease Transactions - Simplify lease accounting tasks compliant with IFRS16, tracking dates, contacts, and payments for improved workflow and quick access to information.

Built-in Visibility - Prevent mischarges with integrated tracking of serial numbers, warranty offers, default vendors, and installation dates. Avoid unnecessary customer invoicing for warranty-covered work.

Enforce Audit Trail - Automatically create a complete audit trail of all transactions, tracking user entries, approvals, and modifications. Ensure compliance by monitoring agreement requirements, lien waivers, certificates, and safety notices.

Operations Productivity and Efficiency

People and Business Synchronization, Increase Collaboration, and Effective Controls

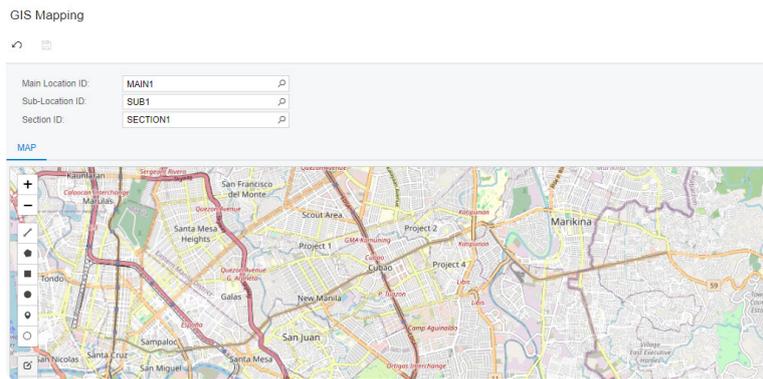

Optimize Manpower Resourcing - Maximize workforce efficiency by scheduling the right people at the right time. Accurately determine capacity needs and report on resource utilization and efficiency.

Advanced Asset Tracking - Maintain detailed equipment records, including maintenance schedules, warranties, serial numbers, vendors, sale, and installation dates, through a comprehensive tracking system.

Streamline Preventive Maintenance - Ensure smooth preventive maintenance appointments, improving service quality, throughput, and capacity utilization.

Improve Customer Service - Gain full visibility of customer equipment, including serial numbers, history, and warranties. Quickly identify problems and schedule maintenance for immediate resolution.

Digital Facility Management - Automate facility management, maintaining records of work orders, renovations, permits, and violations. Conduct cost-effective repairs to enhance productivity.

Customer friendly Tech Leadership on the Cloud

Flexible Deployment, Full Data Transparency, Open APIs, Enterprise Cloud Level Security

Data Ownership & Flexibility - You decide where to host your data: on the public cloud, in a private cloud, or on-premises. With Acumatica, your data is always secure and always in your control. You can do a full relational database export at any time.

Adaptable - Open APIs for ease of integration with a mobile framework that mirrors code-base changes. Role-based views and dashboards with simple low code/no code customizations.

Modern Security - Enterprise-grade security features such as server-side logic, detailed access controls, and robust multifactor authentication built-in.

-------------------	-----	-------	---------------	-------------------------------	-------	-----------------	--------------------------------

Asset Hierarchy & Lifecycle Module

Request, reserve and schedule asset usage by project, including commissioning and decommissioning time.

Transfer assets from one location to the next.

Visualize asset layout & locations from GIS maps and floor plans.

Do root cause analysis for unplanned downtime to learn from past mistakes / experience.

Asset Maintenance Module

Preventive maintenance schedules can be maintained per asset and maintenance templates can be stored to make this job faster.

Integrate ABB Sensors on electric motors, electric pumps and electrical line drivers for automated inspection orders when critical motors, pumps & line drivers are operating beyond parameters which may signal imminent failure or needs maintenance.

Implement Reliability Centered Maintenance principles using RPN scoring to assess asset criticality to plan for maintenance work.

Work Order Management Module

Work order management features help match the right technician with the right skills, for a work order. Schedule your technicians using a visual calendar board to make sure there are no double bookings and adequate time is allotted per work order.

Maintain reliable and complete records of all Maintenance, Repairs, Overhaul and Modifications on all your assets and analyze which manufacturer, brand and model is not performing well compared to similar assets to guide future purchasing decisions.

Philippine Taxation Module Key Features

Easy to use interface - All the information drawn from the different branches of the company can easily be inputted in the user interface, allowing for quick setup for tax filing. The digital forms are easy to understand and necessary information can easily be encoded.

Withholding Taxes - These are immediately recognized upon invoicing or payment.

DAT File Generator - Readily available for Alphalist and Vat Relief to make electronic filing easy. Copies of BIR Form 2307 received by customers and vendors are monitored.

Full BIR Reporting - Different forms and templates are in the system making it easy to submit reports for internal revenue review.

Seamless integration with Acumatica Modules - The system is fully integrated to Inventory, Financial Management, Expense Management, and Project accounting, allowing for real-time updates when making changes in just one ledger.
